

## Wrinkle Relaxing/Line Taming...

Molly Hanson-Steel has the highest degree of expertise in facial aesthetics, and in the structure of the face, facial anatomy and physiology, teaching within colleges, salons, and spas to therapists, and medics. As part of her teaching sessions, she has lectured in some of the most well known colleges within the North West, where she teaches students on the subject of; skin structure, its appendages, blood circulation, lymphatic system, muscles, nervous system, and bone structure as well as advanced and non-surgical treatments, salon hygiene, and sterilisation.

### Relax those wrinkles...the Uber Beauty way!

'As the movement and stability between our elevator muscles and depressor muscles control facial expression, I feel that the best effects from facial rejuvenation require the construction of muscular balance'.

'By inhibiting the activity of specific muscles (via botox), thus relying on other muscles to either increase or sustain their action, we can create this 'balance'. However, as each one of us differs so do our muscles, therefore we require specific treatments for us as an individual. For this reason, variations of doses and injection sites are important to achieve this'.

'Prior to treatment, the aims and expectations of our clients are accurately noted, and a consultation plan is devised to maximise the chances of a successful outcome. We will provide you with an honest evaluation providing you with realistic outcomes. This is crucial to the final result'.

Having extensive knowledge and vast experience relating to injectable treatments and facial anatomy is essential in making judgments about the aesthetic outcomes of any non-surgical injections so you can be certain, that you are in very good hands!

**NB:** As a prescriptive product is used, a non refundable £30.00 pre-consultation fee is due when you book your appointment to cover your prescription cost. We will undertake a consultation prior to your treatment to assess your suitability for treatment and to complete the necessary documentation for your prescription.

### Wrinkle Relaxing/Line taming:

(frown line, forehead lines and crows feet)

1st area - £180.00

2nd area - £50.00

\*Please note as men tend to have stronger muscles groups, more product will be used therefore there is a 'one off supplement' at each treatment session for all male clients, on top of the normal prices above.

\*Supplements for men - £40.00

'My experience has shown that non-surgical injections are best made in fully prepared skin that is as resilient and as elastic as possible - so why not plan to have your injections a week or so after one of our chemical peel treatments'? For example, a mild strength Glycolic or Lactic Acid peel will achieve high levels of skin resurfacing as well as stimulating collagen and elastin, thus promoting rejuvenation that will facilitate the placing of the injections. These sorts of peels normally require no recovery time - they are 'non-ablative', which means that usually you will not visibly shed skin - and will leave your skin feeling clean, soft, smooth and refreshed'.

For information on our more 'advanced TCA, Glycolic, salicylic, Pyruvic or Retinol peels', please see our '**chemical peels**' section.
